

STAND DESIGNS TO SUIT YOUR PRODUCT, SERVICES & BUDGET

STAGE ONE PRELIMINARY CONCEPT

Preliminary concept designed and presented in 3D outline format based on initial briefing and display requirements. This allows you as the client to be an integral part of the design process, allowing for quick changes prior to proceeding to Stage Two.

STAGE TWO DEVELOPED COLOURED CONCEPT

Stage One approved concept is brought to life using coloured artists impressions based on client branding. This stage of the process assists in providing an indicative depiction of the final stand build, including graphic placement, finishes and furniture.

STAGE THREE CONSTRUCTION AND INSTALL

Stand construction will commence on approval of Stage Two concept. During this process, the client and builder will liaise to ensure all areas of the stand build are covered for a seamless onsite installation.
