DISPLAYING ART ON YOUR PANELS

White Octanorm Display Boards

You can apply **removable vinyl stickers** or **double-sided tape** directly to your boards. **Blu tac** and **3m tape** are also compatible with our white boards. No permanent fixings such as hooks, screws, nails or paint are to be used. All of our panels are reusable, so we need to make sure they're in top condition for the next exhibitor to use them.

Also available:

These panels can also be installed for an additional cost with lighting and our gallery grade art hanging system and hooks. Available on one side or both sides of the board (2 wires and 2 adjustable hooks per side).
