# Fabric Walling System

About Our Walling System:

Our walling system is covered in black front runner, a durable non-woven fabric.

Compatible with:

- Hook velcro dots/tape
- Push pins or thumb tacks
- Staples

Key Features and Installation:

- **Stability**: A support panel is required every 3 metres to prevent movement and ensure structural integrity.
- **Seamless Finish**: Top and bottom clips join panels to create a continuous, uninterrupted wall.
- **Location**: For safety and stability, walling is for use on hard, indoor surfaces only.
- **Quality Check**: The finished wall must be signed off by both the installer and the customer to confirm its stability and suitability.
