

Octanorm Walling System

About Our Walling System:

Our walling system is wrapped in white vinyl, with an aluminium frame.

Compatible with:

-  Removable vinyl stickers
-  Removable double-sided tape
-  Blu tack

Key Features and Installation:

- **Stability:** A support panel is required every 3 metres to prevent movement and ensure structural integrity.
- **Structure:** Panels are securely joined with a tension lock system, locking each beam together.
- **Location:** For safety and stability, walling is for use on hard, indoor surfaces only.
- **Quality Check:** The finished wall must be signed off by both the installer and the customer to confirm its stability and suitability.
